British Consulate Bahia

---

Pursuant to a warrant of
Survey unto us directed by
Edward Porter Esquire Her
Britannic Majesty's Consul
for this City and Province of
Bahia dated 29th day of
May 1849. We the undersigned
assembled on board the British
Brig "Cockade" of Sunderland
of 129 4 Tons burthen or thereabouts
she having been lightened
as recommended in a former
survey and observed the said
Brig to be much strained in
her upper works that upon
examination we found a leak
under the Larboard quarter
occasioned by the starting of
a Butt end that the wood
ends forward and a Butt End
under the Starboard main
Chains appeared started all
these defects are at present
above water. We further
state that upon sounding the
well we found her to make
at present two inches water per
hour, thus showing the
existence of further defects
under

under the present water line.
We therefore suggest the propriety
of fully discharging the vessel
cleaning the bends fore and
aft from pitch to bilging a
plank out of each bin and
each quarter in the bends also
two streakes of the Ceiling
over the floor heads on each
side fore and aft, in order that
the frame of the vessel may
undergo a thorough survey
and to ascertain if it will be
necessary to heark her down
to complete her repairs, so as
to enable her to proceed on
her voyage in safety.
Thus we have done and do
now report at Bahia under
our hands upon oath this
second day of June one
thousand Right hundred
and forty nine.

(signed) H. Hale
Master of ship "Star"

(signed) Steward Edrington
Mr of Barque Sultana

Sworn before me at the
British Consulate.
